ELDAC Digital Dashboard

The **ELDAC Digital Dashboard** provides aged care leaders clear, board-ready insights on end-of-life care quality, compliance and performance trends. It works by using your existing data through Power BI to support oversight, accreditation preparation and governance reporting. Best of all, this is provided at no cost.

Simple localised build process:

Your Clinical System Data → Manual/Automated → Export as Excel Dataset → Automated → ELDAC Power BI Dashboard

How this helps you

- See end-of-life care activities tagged to relevant quality standards
- Review advance care planning completion and trends
- Track hospitalisation and resident decline trends to support oversight and resource allocation decisions

Next step

- Send an email to ELDAC's Digital Dashboard Lead by scanning the QR code and we will contact you.
