

Intersectoral partnership to integrate and implement a palliative care technology into aged care: Carinity & ELDAC Flinders experience

Dr Priyanka Vandersman, Ms Larissa Gear & Professor Jennifer Tieman

The ELDAC Digital Dashboard is a digital solution that provides aged care services with a comprehensive framework to organise their palliative care processes.

Partnership between the ELDAC (Flinders) team and Carinity aged care service facilitated the in-house technical integration, and service implementation of the Digital Dashboard.

Dashboard
demo!

Key achievements of this collaboration:

1. Demonstrated feasibility of service level integration of a novel palliative care technology into existing Clinical system.
2. Dashboard was implemented across 11 Carinity sites - the value of this innovation realised at clinician (care provisioning) and manager (service level planning) level.
