

ELDAC Allied Health Toolkit

An evidence-based resource to support the palliative care practice of allied health professionals when caring for a person at the end of their life.

The toolkit is designed to support a range of allied health professionals including occupational therapists, pharmacists, physiotherapists, psychologists, social workers, dietitians, and speech pathologists in providing quality palliative care to their patients.

The Allied Health Team

- Describes each discipline's role in end-of-life care, offering practical tools and resources to integrate into daily practice.

Practising in Aged Care

- Offers guidance on end-of-life communication, with case studies and resources for improving skills in sensitive conversations and advance care planning.

Guidance and Research

- A collection of key documents and palliative care guidelines specific to each allied health discipline.
- Provides links to evidence summaries and search tools for staying current and exploring best practices.

The toolkit will be regularly updated to reflect changes in clinical guidance and funding models.

View the Allied Health Toolkit on the ELDAC website.
